

Job Description: LNG / Energy Analyst / Senior Analyst

Position Types: Full-time

Office Location: 7200 Wisconsin Ave, Suite 750, Bethesda, MD 20814

About K&M Advisors:

K&M is an internationally-recognized infrastructure finance and engineering advisory firm. Since its creation in 1987, K&M has advised private investors, multilateral agencies, and governments on the development of power, water, and telecommunications projects valued at over US\$30 billion. K&M provides a range of technical, financial, and economic consulting services, including transaction advisory, project development advisory, due diligence, and policy and regulatory advisory. K&M is owned by the Dorado Group, a private developer, owner, operator, and manager of IPPs.

K&M's Strategic Practice is looking for a full-time analyst or senior analysts to join the team. The practice focuses on advisory projects of strategic importance to K&M—that is, in areas where K&M wants to grow. Examples of the practice's work are advising on the development of LNG-to-Power projects in Aruba, Vietnam and Namibia, advising a power utility on the creation of a community solar PV business, financial and economic analysis of a waste to energy project, and advising a project developer on a biomass power plant.

As an analyst or senior analyst in K&M's Strategic practice, you'll work directly with K&M's President and across disciplines to support the following activities:

- Economic analysis (including cost-benefit analysis and LCOE calculations)
- Financial modeling for LNG and power generation projects
- Managing and analyzing inputs from technical experts
- Processing and analyzing data from electricity markets
- Topical research
- Producing professional-grade written reports and presentations
- Developing new business opportunities

You'll gain exposure to all areas of K&M's business. You'll have the opportunity to work in other K&M's practices and on a variety of projects around the world and gain experience in many aspects of energy and finance.

Candidate Profile:

The ideal candidates are:

- **Interested in LNG to power**, as well as power generation projects, and have some exposure to LNG and power through previous work experience
- **Skilled at using Excel**, and have demonstrated experience developing financial models, including: project finance models, pro-forma financial statement forecasts, levelized cost of electricity calculations, and cost-benefit analyses
- **Excellent writers**, with the ability to deliver high-quality, professional written material in English that are grammatically correct and display a high attention to detail
- **Exceptional verbal communicators in English**, with the ability to articulate complex concepts and present analytical material to a variety of audiences, and prepare effective PowerPoint presentations
- **Experienced in corporate finance (and micro-and macroeconomics)** concepts and can apply these to real-life projects
- Interested in **growing professionally in a long-term career, while maintaining a sustainable work-life balance.**

Minimum Qualifications:

- Graduate degree in business, economics, or finance or related field
- At least 2 years of relevant work experience
- Excellent English (oral and written) communication skills

Only applicants with valid work authorization in the U.S. will be considered.

To Apply:
